Sterling Capital Advisory Solutions Monthly Update

January 2026

Asset Allocation Update	
<ul style="list-style-type: none"> We recommend an underweight to Global Equities vs. Fixed Income. Within the equity allocation, we recommend an overweight to U.S. Equities and an underweight to Emerging Market Equities. Within the fixed income allocation, we recommend an overweight to U.S. TIPS. 	
Equity Market Highlights	Fixed Income Market Highlights
<ul style="list-style-type: none"> Global equities, as defined by the MSCI ACWI IMI, returned +1.03% in December, which represented the ninth consecutive month of positive returns. Many of the same themes that were prevalent in November continued into December (e.g., value outperformed growth and international outperformed the U.S.) Value (MSCI ACWI Value Index +1.87%) outperformed growth (MSCI ACWI Growth Index +0.21%), which was driven by strong gains in value-centric sectors such as financials and materials. International developed markets (MSCI World ex USA IMI +2.92%) and emerging markets (MSCI EM IMI +2.70%) outperformed the U.S. (Russell 3000® Index -0.02%) during the month. Within international developed markets, relative strength in Germany, the U.K., and Switzerland drove markets higher, while strong gains in South Korea and South Africa offset weakness in China, Brazil, and India within emerging markets. Actively-managed strategies generally struggled to keep pace with passively-managed counterparts in 2025, particularly in the U.S. mid-cap and small-cap segments. On a rolling five-year basis, U.S. growth outperformance relative to value declined in December. Although the gap between growth and value returns has closed in recent periods, rolling five-year growth returns have consistently been ahead of value returns since 2017. 	<ul style="list-style-type: none"> The broad bond market, as represented by the Bloomberg U.S. Aggregate Bond Index, returned -0.15% in December, bringing its year-to-date return to +7.30%, the best annual return for the index since 2020. With December's negative return, it broke a four-month streak of positive returns for the index. For the month, Agency mortgage-backed securities (MBS) was the top-performing sector within the Aggregate Index and was also the top performer for the calendar year. Outside of the Aggregate Index, High Yield (+0.57%) and Emerging Market Debt (+0.43%) were the top performers, also outpacing Agency MBS (+0.21%). Conversely, TIPS (-0.40%) and U.S. Governments (-0.33%) declined for the month. Global Treasuries ex. U.S. were the bottom performers for the year, returning 2.03%. Overseas for the month, 10-year government bond yields were modestly higher in Germany, France, Italy, and the U.K. Domestically, the yield on the 10-year Treasury moved higher from 4.01% to 4.17% over the month, but lower over the calendar year by 0.40%. Front-end Municipal/Treasury ratios moved lower in December, with the 2-year, 3-year, 5-year, and 10-year ratios lower between 0.80-1.90%. Over the year, front-end ratios are higher (2-year and 3-year higher by over 2.00%), while intermediate to longer ratios saw muted changes (by less than 0.40%). Current ratios are in line with 5-year historical averages.

Global Economic Snapshot

YOY Real GDP Growth (\$U.S.)

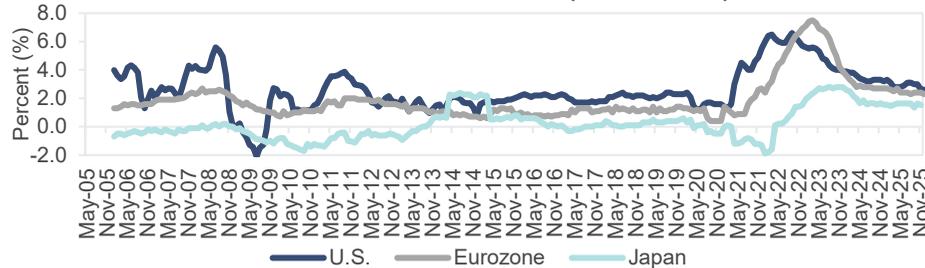

U.S., Eurozone, and Japan data is as of 09.30.2025. Source: FactSet.

YOY U.S. Industrial Production and Productivity

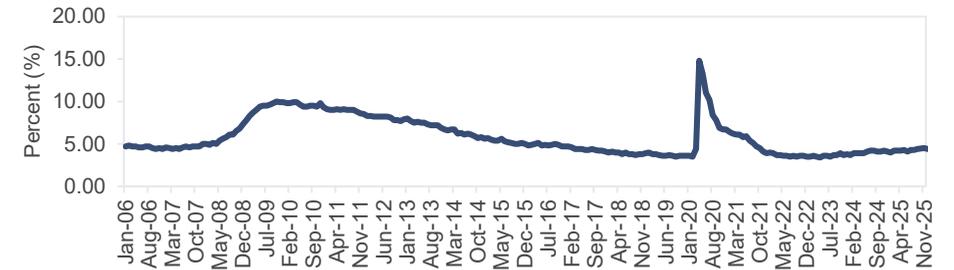

Industrial Production as of 11.30.2025. Industrial Productivity data as of 09.30.2025. Source: FactSet.

Core Consumer Price Index (YoY Growth)

U.S. & Eurozone data is as of 12.31.2025. Japan data is as of 11.30.2025. Source: FactSet. The sudden increase in Japan CPI growth in 2014 coincided with an increase in national sales tax that impacted final price levels.

U.S. - Unemployment Rate

Data is as of 12.31.2025. Source: FactSet.

- Based on initial estimates, quarterly U.S. gross domestic product (GDP) was strong in the third quarter, pushing year-over-year growth higher to 2.33%. Growth in Europe and Japan slowed in the third quarter.
- The U.S. unemployment rate declined to 4.4% in December, ending the year 0.3% higher than the start of 2025.
- Year-over-year, U.S. core inflation held steady at 2.6% in December, but is down from 3.2% at the start of 2025. Inflation in Europe ticked lower to 2.3%, while inflation in Japan remains relatively low.
- U.S. industrial production growth improved in November. U.S. labor productivity growth continued to move higher in the third quarter, but the year-over-year rate remains below 2.0%.

U.S. Economic Indicators

Leading	Initial Jobless Claims	<ul style="list-style-type: none"> In the week ending 01.02.2026, the four-week moving average of Initial Jobless Claims was 211,750, a decrease of 7,250 from the previous week's revised average.
	Manufacturing	<ul style="list-style-type: none"> ISM Manufacturing registered 47.9% in December, a -0.3% decrease from the previous reading. A reading below 50.0% indicates contraction. ISM Manufacturing New Orders registered 47.7% in December, up 0.3% from the previous reading. ISM Non-Manufacturing registered 54.4% in December, a 1.8% increase over the previous reading.
	Housing/Construction	<ul style="list-style-type: none"> Building permits were down -2.35% in August and have decreased -9.89% over the past year.
Coincident	Consumer Confidence	<ul style="list-style-type: none"> The Consumer Confidence Index decreased to 89.1 compared to 92.9 in the previous month.
	Nonfarm Payrolls	<ul style="list-style-type: none"> Total Nonfarm Payroll employment increased by 22,000 in August while the unemployment rate increased to 4.3%.
	Industrial Production	<ul style="list-style-type: none"> Industrial Production increased +0.17% in November and increased +2.52% over the past year.
	Personal Income	<ul style="list-style-type: none"> Real Disposable Personal Income increased +0.11% in August and increased +1.94% over the past year.
Lagging	Ratio of Consumer Installment Credit to Personal Income	<ul style="list-style-type: none"> Real Disposable Personal Income decreased -0.4% in August and decreased -4.7% over the past year. Consumer borrowing tends to lag improvements in personal income by many months because people tend to remain hesitant to take on new debt until they are sure that their improved income level is sustainable.
	Inflation	<ul style="list-style-type: none"> CPI (All Items) increased +0.20% in November and increased +2.71% over the past year. CPI (Core) increased +0.16% in November and increased +2.62% over the past year.

Core Consumer Price Index (CPI): a measure of the aggregate price level in an economy, excluding certain volatile items.

Consumer Confidence Index (CCI): measures what consumers are feeling about their expected financial situation, whether that's optimistic or pessimistic.

Option Adjusted Spread (OAS): A bond's yield spread over comparable maturity government bonds, adjusted for any embedded options.

Real Disposable Personal Income: the amount of money that an individual or household has to spend or save after federal, state, and local taxes and other mandatory charges are deducted.

Real GDP: Real gross domestic product (GDP) is an inflation-adjusted measure that reflects the value of all goods and services produced by an economy in a given year, expressed in base-year prices.

Nonfarm payroll refers to the number of jobs in the private sector and government agencies. It excludes farm workers, private household employees, proprietors, non-profit employees, and actively serving military.

Revenue-to-Firm Value: Total Index Revenues of the past 12 months divided by the sum of equity market value and the value of total debt. This is a measure of total sales generated on the total value (debt plus equity) of firms in the index.

TIPS Breakeven: The inflation rate implied by the spread in yield between U.S. TIPS (Treasury Inflation Protected Securities) and nominal U.S. Government Bonds of equal maturity.

U.S. 3-Year Real Revenue Growth, Russell 3000 Non-Financials: For the Russell 3000 excluding financial firms, the percentage change in trailing 12-month inflation adjusted revenue over 12-month inflation adjusted revenue three years prior.

U.S. Cyclically Adjusted Earnings Yield: The 10-year average of annual, inflation adjusted earnings divided by the current inflation adjusted price of the S&P 500 index. This measure is the inverse of the Shiller CAPE Ratio.

YOY U.S. Productivity Growth: The year-over-year growth in real U.S. output produced per hour worked for non-farm workers.

CAPE Ratio: is a valuation measure that uses real earnings per share (EPS) over a 10-year period to smooth out fluctuations in corporate profits that occur over different periods of a business cycle.

Dividend Risk: refers to the risk of a stock's dividend being cut or eliminated, or to the risk to an option when a dividend is paid.

Dividend Yields: is a financial ratio that shows how much a company pays out in dividends each year relative to its stock price.

Eurozone: consists of those Member States of the European Union that have adopted the euro as their currency.

Municipal Yield: the annual return an investor receives on a municipal bond. It's calculated based on the bond's purchase price, coupon rate, and how long the investor holds the bond.

Treasury Yield: the interest rate the U.S. government pays on its debt securities, expressed as a percentage. It's also the annual return investors earn from holding a U.S. government security.

Capitalization/Style Returns: Capitalization/Style returns are based on the S&P Indexes. All values are cumulative total return for stated period including the reinvestment of dividends. The indexes used from left to right, top to bottom are as follows: S&P 500 Value Index, S&P 500 Index, S&P 500 Growth Index, S&P Mid Cap 400 Value Index, S&P Mid Cap 400 Index, S&P Mid Cap 400 Growth Index, S&P Small Cap 600 Value Index, S&P Small Cap 600 Index, S&P Small Cap 600 Growth Index. The S&P 500[®] Index is a readily available, carefully constructed, market-value-weighted benchmark of common stock performance. Currently, the S&P[®] Composite includes 500 of the largest stocks (in terms of stock market value) in the United States; prior to March 1957 it consisted of 90 of the largest stocks. The S&P Midcap 400 is designed to measure the performance of the middle capitalization sector of the U.S. equities market. This market capitalization weighted index was created in June of 1991 and consists of 400 domestic stocks from the NYSE, NASDAQ, and AMEX chosen for market size, liquidity and industry group representation. The S&P SmallCap 600 is designed to measure the performance of the small capitalization sector of the U.S. equities market. This index consists of 600 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation. The S&P Style indices measure growth and value along two separate dimensions, with three factors each used to measure growth and value. The Growth factors are 3 Year Change in Earnings per Share over Price per Share, 3 Year Sales per Share Growth Rate, and Momentum. The Value factors are Book Value to price Ratio, Earnings to Price Ratio, and Sales to Price Ratio.

Important Information

Index Definitions & Disclosures

A Note on Indices: The volatility of an index varies greatly; all indices are unmanaged and investments cannot be made directly in an index. Indices are shown for illustrative purposes only and do not represent the performance of any specific investment. The indices selected by Sterling Capital Management to measure performance are representative of broad asset classes. Sterling Capital Management retains the right to change representative indices at any time.

The **Bloomberg Emerging Markets Hard Currency Aggregate Index** is a flagship hard currency Emerging Markets debt benchmark that includes USD-denominated debt from sovereign, quasi-sovereign, and corporate EM issuers.

The **Bloomberg Global Treasury Ex U.S. Hedged Index** is comprised of securities issued by developed ex. U.S. and emerging market governments. The index is hedged against constituent currencies versus the U.S. dollar.

The **Bloomberg Global Treasury Index** is a broad benchmark that tracks the performance of fixed-rate, local currency government debt of investment-grade countries, including both developed and emerging markets, excluding the United States. It's essentially the treasury sector of the Global Aggregate Index.

The **Bloomberg U.S. Aggregate Bond Index** is an unmanaged index composed of securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. It is not possible to invest in the Bloomberg U.S. Aggregate Bond Index, which is unmanaged and does not incur fees and charges.

The **Bloomberg U.S. Corporate High Yield Index** measures the U.S. corporate market of non-investment grade, fixed-rate corporate bonds. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below.

The **Bloomberg U.S. Credit Index** measures the investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate and government related bond markets. It is composed of the U.S. Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities.

The **Bloomberg U.S. Government Index** is comprised of securities issued by the U.S. government and its agencies with at least one year until final maturity.

The **Bloomberg U.S. MBS Index** covers the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). It is formed by grouping the universe of individual fixed rate MBS pools into generic aggregates.

The **Bloomberg U.S. Treasury Inflation-Linked Bond Index (Series-L)** measures the performance of the U.S. Treasury Inflation Protected Securities (TIPS) market. Federal Reserve holdings of U.S. TIPS are not index eligible and are excluded from the face amount outstanding of each bond in the index.

The **Bloomberg Commodity Index** and related sub-indices are composed of futures contracts on physical commodities and represents 22 separate commodities traded on U.S. exchanges, with the exception of aluminum, nickel and zinc.
