Sterling Capital Advisory Solutions Monthly Update

March 2024

Equity Market Highlights	Fixed Income Market Highlights
<ul style="list-style-type: none"> Global equities rose for the fourth consecutive month in February (MSCI ACWI IMI +4.18%), driven again by strong results in the growth segment of the market (MSCI ACWI Growth +5.93% vs MSCI ACWI Value +2.58%). U.S. small-cap growth (Russell Top 200® Growth Index +8.12%) was among the top-performing market segments during the month, while international developed markets value lagged (MSCI World ex-USA Value +0.10%). Emerging markets (MSCI EM IMI +4.46%) produced better results after a difficult January, with relative strength in China, Taiwan, and South Korea leading the segment higher. Active managers have generally fared well against their passive counterparts year-to-date, with actively-managed mid-cap value and small-cap growth strategies generating particularly strong relative performance. On a rolling five-year basis, U.S. growth outperformance relative to value rose from the previous month. Growth's strong start to the year was driven by relative strength in mega-cap companies such as NVIDIA and Meta Platforms. 	<ul style="list-style-type: none"> The broad market, as represented by the Bloomberg U.S. Aggregate Bond Index, returned -1.41% for the month of February, making it the second consecutive month of negative returns. The top-performing areas of the market for February were positive, as Emerging Market Debt returned +0.38% and High Yield returned +0.29%. Higher quality parts of the market lagged, specifically Mortgage-Backed Securities (-1.63%), U.S. Investment Grade Credit (-1.44%) and U.S. Governments (-1.30%) generated negative returns. Following declines in November and December, 10-year yields reversed course and moved higher in January and again in February in select countries. In February alone, 10-year yields in the U.K. increased by 41 basis points (bps), followed by Germany (up 24 bps), France (up 21 bps) and Italy (up 11 bps). The yield on the 10-year U.S. Treasury increased by 29 bps from 3.95% to 4.24%. Municipal/Treasury ratios moved lower in February, led by three-year ratios which declined by 5.5%. All ratios remain below their five-year average.

Global Economic Snapshot

YOY Real GDP Growth (\$U.S.)

U.S., Japan and Eurozone data is as of 12.31.2023. Source: FactSet.

YoY U.S. Industrial Production and Productivity

Industrial Production data is as of 01.31.2024. Industrial Productivity data is as of 12.31.2023. Source: FactSet.

Core Consumer Price Index (YoY Growth)

Eurozone as of 02.29.2024. Japan and U.S. data is as of 01.31.2024. Source: FactSet. The sudden increase in Japan CPI growth in 2014 coincided with an increase in national sales tax that impacted final price levels.

U.S. - Unemployment Rate

Data is as of 02.29.2024. Source: FactSet.

- Positive economic momentum has continued in the U.S. as year-over-year growth exceeded 3% in 2023 based on initial estimates. Growth in Europe is lagging and is only slightly positive, while growth in Japan has also slowed.
- The U.S. unemployment rate increased to 3.9% in February despite another month of strong nonfarm payroll growth.
- U.S. inflation exceeded expectations again in February and remains elevated despite recent moderation. Year-over-year inflation continues to slow from high levels in Europe and Japan inflation slowed in January from peak levels.
- U.S. industrial production growth was slightly negative in January and remains weak on a year-over-year basis. Following a weak first quarter last year, U.S. labor productivity growth was solid the remainder of the year and ended 2023 at 2.6%.

Yield Spread of Bloomberg U.S. Treasury Index to Global Ex-U.S. Treasury Index

Data is as of 02.29.2024. Source: Bloomberg L.P.

- Investment grade credit spreads were unchanged in February, while high yield spreads declined significantly. Spreads in both markets are well below long-run averages.
- 10-year TIPS breakeven rates increased for the second consecutive month in February.
- Emerging Market Debt credit spreads declined in February and remain well below the historical average. After three consecutive months of declines, the yield spread of U.S. to Global Treasuries increased in February.

TIPS = Treasury Inflation-Protected Securities.

U.S. Treasury Yield Curve

- While yields moved higher in February, the early part of March saw yields decline. As of March 8, month-over-month, six-month yields as well as one- and two-year yields were higher between four and 11 bps. Rates beyond two-years were higher, with the 30-year yield increasing the most by six bps. From the year prior, yields in the belly of the curve (one-year to seven-years) were lower, while front-end and back-end yields were higher.

Any type of investing involves risk and there are no guarantees that these methods will be successful. Past performance is no guarantee of future results.

Global Equity Market Fundamentals

U.S. Cyclically-Adjusted Earnings Yield

Data is as of 02.29.2024. Sources: Bloomberg L.P.; Robert Shiller "U.S. Stock Markets 1871 - Present and CAPE Ratio."

U.S. 3-Year Real Revenue Growth - Russell 3000 Non-Financials

Data is as of 02.29.2024. Sources: FactSet; Russell; Bureau of Labor Statistics; Sterling Capital Management Analytics.

Revenue to Firm Value

Data is as of 02.29.2024. Sources: FactSet; Russell; MSCI.

Dividend Yield

Data is as of 02.29.2024. Sources: FactSet; Russell; MSCI.

- The U.S. cyclically-adjusted earnings yield continued to decline in February due to equity price increases.
- Although down slightly from the prior month, long-term real U.S. sales growth for non-financial companies has improved rapidly. Companies have been growing revenues at a rate outpacing inflation and, in addition, growth is now calculated over a base year that was depressed by COVID-19 impacts.
- Revenue-to-firm value ratios and dividend yields declined across markets in February.

Core Consumer Price Index: a measure of the aggregate price level in an economy, excluding certain volatile items.

Option Adjusted Spread (OAS): A bond's yield spread over comparable maturity government bonds, adjusted for any embedded options.

Real GDP: Real gross domestic product (GDP) is an inflation-adjusted measure that reflects the value of all goods and services produced by an economy in a given year, expressed in base-year prices.

Nonfarm payroll refers to the number of jobs in the private sector and government agencies. It excludes farm workers, private household employees, proprietors, non-profit employees, and actively serving military.

Revenue-to-Firm Value: Total Index Revenues of the past 12 months divided by the sum of equity market value and the value of total debt. This is a measure of total sales generated on the total value (debt plus equity) of firms in the index.

TIPS Breakeven: The inflation rate implied by the spread in yield between U.S. TIPS (Treasury Inflation Protected Securities) and nominal U.S. Government Bonds of equal maturity.

U.S. 3-Year Real Revenue Growth, Russell 3000 Non-Financials: For the Russell 3000 excluding financial firms, the percentage change in trailing 12-month inflation adjusted revenue over 12-month inflation adjusted revenue three years prior.

U.S. Cyclically Adjusted Earnings Yield: The 10-year average of annual, inflation adjusted earnings divided by the current inflation adjusted price of the S&P 500 index. This measure is the inverse of the Shiller CAPE Ratio.

YOY U.S. Productivity Growth: The year-over-year growth in real U.S. output produced per hour worked for non-farm workers.

Capitalization/Style Returns: Capitalization/Style returns are based on the S&P Indexes. All values are cumulative total return for stated period including the reinvestment of dividends. The indexes used from left to right, top to bottom are as follows: S&P 500 Value Index, S&P 500 Index, S&P 500 Growth Index, S&P Mid Cap 400 Value Index, S&P Mid Cap 400 Index, S&P Mid Cap 400 Growth Index, S&P Small Cap 600 Value Index, S&P Small Cap 600 Index, S&P Small Cap 600 Growth Index. The S&P 500[®] Index is a readily available, carefully constructed, market-value-weighted benchmark of common stock performance. Currently, the S&P[®] Composite includes 500 of the largest stocks (in terms of stock market value) in the United States; prior to March 1957 it consisted of 90 of the largest stocks. The S&P Midcap 400 is designed to measure the performance of the middle capitalization sector of the U.S. equities market. This market capitalization weighted index was created in June of 1991 and consists of 400 domestic stocks from the NYSE, NASDAQ, and AMEX chosen for market size, liquidity and industry group representation. The S&P SmallCap 600 is designed to measure the performance of the small capitalization sector of the U.S. equities market. This index consists of 600 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation. The S&P Style indices measure growth and value along two separate dimensions, with three factors each used to measure growth and value. The Growth factors are 3 Year Change in Earnings per Share over Price per Share, 3 Year Sales per Share Growth Rate, and Momentum. The Value factors are Book Value to price Ratio, Earnings to Price Ratio, and Sales to Price Ratio.

Important Information

Index Definitions & Disclosures

A Note on Indices: The volatility of an index varies greatly; all indices are unmanaged and investments cannot be made directly in an index. Indices are shown for illustrative purposes only and do not represent the performance of any specific investment. The indices selected by Sterling Capital Management to measure performance are representative of broad asset classes. Sterling Capital Management retains the right to change representative indices at any time.

The **Bloomberg Emerging Markets Hard Currency Aggregate Index** is a flagship hard currency Emerging Markets debt benchmark that includes USD-denominated debt from sovereign, quasi-sovereign, and corporate EM issuers.

The **Bloomberg Global Treasury Ex U.S. Hedged Index** is comprised of securities issued by developed ex. U.S. and emerging market governments. The index is hedged against constituent currencies versus the U.S. dollar.

The **Bloomberg U.S. Aggregate Bond Index** is an unmanaged index composed of securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. It is not possible to invest in the Bloomberg U.S. Aggregate Bond Index, which is unmanaged and does not incur fees and charges.

The **Bloomberg U.S. Corporate High Yield Index** measures the U.S. corporate market of non-investment grade, fixed-rate corporate bonds. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below.

The **Bloomberg U.S. Credit Index** measures the investment grade, U.S. dollar-denominated, fixed-rate, taxable corporate and government related bond markets. It is composed of the U.S. Corporate Index and a non-corporate component that includes foreign agencies, sovereigns, supranationals and local authorities.

The **Bloomberg U.S. Government Index** is comprised of securities issued by the U.S. government and its agencies with at least one year until final maturity.

The **Bloomberg U.S. MBS Index** covers the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). It is formed by grouping the universe of individual fixed rate MBS pools into generic aggregates.

The **Bloomberg U.S. Treasury Inflation-Linked Bond Index (Series-L)** measures the performance of the U.S. Treasury Inflation Protected Securities (TIPS) market. Federal Reserve holdings of U.S. TIPS are not index eligible and are excluded from the face amount outstanding of each bond in the index.

The **Bloomberg Commodity Index** and related sub-indices are composed of futures contracts on physical commodities and represents 22 separate commodities traded on U.S. exchanges, with the exception of aluminum, nickel and zinc.

Bloomberg L.P.: "Bloomberg®" and the Bloomberg indices are service marks of Bloomberg Finance L.P. and its affiliates, including Bloomberg Index Services Limited ("BISL"), the administrator of the index (collectively, "Bloomberg") and have been licensed for use for certain purposes by Sterling Capital Management LLC and its affiliates. Bloomberg is not affiliated with Sterling Capital Management LLC or its affiliates, and Bloomberg does not approve, endorse, review, or recommend the product(s) presented herein. Bloomberg does not guarantee the timeliness, accurateness, or completeness of any data or information relating to the product(s) presented herein.

The **Dow Jones Equity All REIT Index** is designed to measure all publicly traded real estate investment trusts in the Dow Jones U.S. stock universe classified as equity REITs according to the S&P Dow Jones Indices REIT Industry Classification Hierarchy. These companies are REITs that primarily own and operate income-producing real estate.

The **MSCI ACWI Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

The **MSCI EAFE Index** is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada.

The **MSCI Emerging Markets Index** is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets.

The **MSCI Emerging Markets Growth Index** captures large and mid cap securities exhibiting overall growth style characteristics across 26 Emerging Markets (EM) countries. The growth investment style characteristics for index construction are defined using five variables: long-term forward EPS growth rate, short-term forward EPS growth rate, current internal growth rate and long-term historical EPS growth trend and long-term historical sales per share growth trend.

The **MSCI Emerging Markets Value Index** captures large and mid cap securities exhibiting overall value style characteristics across 26 Emerging Markets (EM) countries. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

The **MSCI ACWI ex USA Growth Index** captures large and mid cap securities exhibiting overall growth style characteristics across 22 Developed Markets (DM) countries and 26 Emerging Markets (EM) countries.

Important Information

Index Definitions & Disclosures

A Note on Indices: The volatility of an index varies greatly; all indices are unmanaged and investments cannot be made directly in an index. Indices are shown for illustrative purposes only and do not represent the performance of any specific investment. The indices selected by Sterling Capital Management to measure performance are representative of broad asset classes. Sterling Capital Management retains the right to change representative indices at any time.

The **MSCI World ex USA Small Cap Index** captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the United States). With 2,529 constituents, the index covers approximately 14% of the free float-adjusted market capitalization in each country.

The **MSCI World ex USA Value Index** captures large and mid cap securities exhibiting overall value style characteristics across 22 of 23 Developed Markets countries.

The **Russell 2000® Growth Index** measures the performance of growth style of investing in small cap U.S. stocks. The Growth Index contains those Russell 2000 securities with greater-than-average growth orientation.

The **Russell 2000® Value Index** measures the performance of value style of investing in small cap U.S. stocks. The Value Index contains those Russell 2000 securities with less-than-average growth orientation. Securities in the Value Index generally have lower price-to-book and price-to-earnings ratios than those in the Growth Index.

The **Russell 3000® Index** measures the performance of the 3,000 largest U.S. companies based on total market capitalization.

The **Russell Midcap® Growth Index** measures the performance of growth styles of investing in Mid Cap U.S. stocks. The Growth Index contains those Russell Mid Cap securities with greater-than-average growth orientation.

The **Russell Midcap® Value Index** measures the performance of value style of investing in Mid Cap U.S. stocks. The Value Index contains those Russell Mid Cap securities with less-than-average growth orientation. Securities in the Value Index generally have lower price-to-book and price-to-earnings ratios than those in the Growth Index.

The **Russell Top 200® Growth Index** offers measures the performance of the especially large cap segment of the U.S. equity universe represented by stocks in the largest 200 by market cap. It includes Russell Top 200® Index companies with higher growth earning potential as defined by Russell's leading style methodology.

The **Russell Top 200® Index** is an index of the largest 200 companies in the Russell 3000 index. It is commonly used as a benchmark index for U.S.-based ultra large-cap (mega-cap) stocks with the average member commanding a market capitalization of upwards of \$200 billion.

The **S&P® 500 Index** is an unmanaged capitalization-weighted index of 500 U.S. stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

The **S&P Small Cap 600® Index:** The S&P SmallCap 600® Index is designed to measure the performance of the small capitalization sector of the U.S. equities market. This index consists of 600 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation.

The **S&P Mid Cap 400® Index:** The S&P MidCap 400® Index is designed to measure the performance of the mid capitalization sector of the U.S. equities market. This index consists of 400 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation.

The **S&P 1500:** An investable U.S. equity benchmark, the S&P Composite 1500 combines three leading indices, the S&P 500®, the S&P MidCap 400, and the S&P SmallCap 600 to cover approximately 90% of the U.S. market capitalization. It is designed for investors seeking to replicate the performance of the U.S. equity market or benchmark against a representative universe of tradable stocks.

The **Trade-Weighted U.S. Dollar Index**, also known as the broad index, is a measure of the value of the United States dollar relative to other world currencies. It is a trade weighted index that improves on the older U.S. Dollar Index by using more currencies and the updating the weights yearly.
