Dividend Receivable Deduction (DRD) Percentages

Listed below are Sterling Capital Funds that, as of the latest calendar year, had ordinary income (i.e., dividend income plus short-term capital gains, if any) that would qualify for the corporate dividends-received deduction for 2017. The right column lists the percentage of each fund's qualifying ordinary income (%DRD).

Subject to certain restrictions, for Federal Income Tax purposes the Internal Revenue Code allows a corporate shareholder to deduct 70% of qualifying dividend income received from domestic corporations. To determine the amount of dividends qualifying for this deduction, multiply the % DRD (shown in the table below) by the amount of your total ordinary dividends. Ordinary dividends of a mutual fund include net short-term capital gains and foreign taxes.
