

Weekly Market Update

November 3, 2025

Economic & Market News

This Week:

- U.S. economic reports scheduled to be released this week include Institute for Supply Management (ISM) Manufacturing, trade balance, durable orders, job openings and labor turnover survey (JOLTS), ISM Services, productivity, and nonfarm payrolls, although certain reports may be delayed due to the government shutdown.
- Non-U.S. economic reports scheduled to be released this week include Producer Price Index (PPI) and retail sales in Europe as well as trade balance and foreign exchange (FX) reserves in China.

Week in Review:

- The Federal Reserve (Fed) cut rates by 0.25% to a target range of 3.75%-4.00%. The Fed also announced an end to reducing its \$6.6T balance sheet beginning December 1. As for the path of rates going forward, in his post-meeting press conference, Fed Chairman Jerome Powell emphasized “strongly differing views on how to proceed in December”.
- Consumer Confidence registered at 94.6, slightly above consensus expectations
- Overseas, year-over-year inflation reports were released for Japan which registered at 2.8%, and the Eurozone at 2.1%.

Economic & market news provided by Sterling Capital Advisory Solutions.

Commodity rates (oil, gold, gasoline), **currency rates** (dollar per pound sterling, dollar per euro, yen per dollar), **upcoming U.S. economic events**, **bond rates** (fed funds target rate, 2Y Treasury, 10Y Treasury, 3M LIBOR, 10Y municipal, U.S. IG corporate, U.S HY corporate), **10Y Treasury yields** and **S&P 500 Index levels** are all sourced from FactSet.

Capitalization/style returns are based on S&P Indexes. All values are cumulative total return for stated period including the reinvestment of dividends. Top row indices (L-R): S&P 500 Value; S&P 500; S&P 500 Growth. Middle row indices (L-R): S&P Mid Cap 400 Value; S&P Mid Cap 400; S&P Mid Cap 400 Growth. Bottom row indices (L-R): S&P Small Cap 600 Value; S&P Small Cap 600; S&P Small Cap 600 Growth. The S&P 500, S&P Mid Cap 400, and S&P Small Cap 600 are defined on the next page. S&P Style indices measure growth and value along two separate dimensions, with three factors each used to measure growth and value. Growth factors: 3-year change in earnings per share over price per share; 3-year sales per share growth rate; momentum. Value factors: book value to price ratio; earnings to price ratio; sales to price ratio. Source: Morningstar Direct.

Equity index characteristics: P/E, P/B, and P/CF ratios for all indices are based on trailing twelve months (TTM) period. Source: Morningstar Direct. Index definitions are on the next page.

S&P 500 sector returns are based on the GICS Classification model. Returns are calculated by Morningstar Direct using constituents and weights provided by Standard and Poor's. Returns are cumulative total return for the stated period, including reinvestment of dividends. Source: Morningstar Direct.

Index returns: Prices reflect closing price level for each stated date. Source: Morningstar Direct.

The ADP National Employment Report is a monthly report of economic data that tracks trends in the level of nonfarm private employment in the U.S. It is published by Automatic Data Processing and provides a breakdown of data by industry, region, and establishment size.

Consumer Confidence measures the level of consumer confidence in economic activity. It is a leading indicator as it can predict consumer spending, which plays a major role in overall economic activity. The reading is compiled from a survey of about 2,300 consumers in the euro zone which asks respondents to evaluate future economic prospects. Higher readings point to higher consumer optimism.

The ISM Manufacturing Index, also known as the purchasing managers' index (PMI), is a monthly indicator of U.S. economic activity based on a survey of purchasing managers at manufacturing firms nationwide.

The ISM Non-Manufacturing Index is an index that measures the economic condition and performance of service-based companies. It is now called the Services Purchasing Managers' Index (PMI). The index is based on surveys sent to purchasing and supply companies of more than 400 services firms.

The job openings and labor turnover survey (JOLTS) is a monthly report by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor counting job vacancies and separations, including the number of workers voluntarily quitting employment.

The Michigan Consumer Sentiment Index (MCSI) is a monthly survey of consumer confidence levels in the United States conducted by the University of Michigan. The survey is based on telephone interviews that gather information on consumer expectations for the economy.

Nonfarm payroll refers to the number of jobs in the private sector and government agencies. It excludes farm workers, private household employees, proprietors, non-profit employees, and actively serving military.

A non-seasonally adjusted (NSA) dataset shows the original, unmanipulated figures, retaining the full impact of regular, predictable patterns like holiday shopping or weather changes.

Price-to-book (P/B) compares the book value of fund's stocks with their market value. The P/B ratio indicates how much an investor is paying for a company's assets based on historical valuations. It does not reflect current market value.

Price-to-cash flow (P/CF) is a stock valuation indicator or multiple that measures the value of a stock's price relative to its operating cash flow per share.

Price-to-earnings (P/E) compares the price of a fund's stocks with their per-share earnings. A higher ratio indicates the market's belief that a company is able to increase its earnings.

The Producer Price Index (PPI) is a measure of inflation at the wholesale level. It's compiled from thousands of indexes that measure producer prices by industry and product category.

A seasonal adjustment (SA) is a statistical technique designed to even out periodic swings in statistics or movements in supply and demand related to changing seasons. It can, therefore, eliminate misleading seasonal components of an economic time series. Seasonal adjustment is a method of data-smoothing that is used to predict economic performance or company sales for a given period.

A seasonally adjusted annual rate (SAAR) is a rate adjustment used for economic or business data, such as sales numbers or employment figures, that attempts to remove seasonal variations in the data.

Weighted average market capitalization refers to a type of stock market index construction that is based on the market capitalization of the index's constituent stocks.

Important Information

Index Definitions

A Note on Indices: The volatility of an index varies greatly. All indices are unmanaged, and investments cannot be made directly in an index.

The **Bloomberg U.S. Aggregate Bond Index** is an unmanaged, market-value-weighted index of taxable investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities, with maturities of one year or more.

The **Bloomberg Commodity Index (BCOM)** is calculated on an excess return basis and reflects commodity futures price movements. The index rebalances annually weighted 2/3 by trading volume and 1/3 by world production and weight-caps are applied at the commodity, sector and group level for diversification. Roll period typically occurs from 6th-10th business day based on the roll schedule.

The **Bloomberg U.S. Corporate High Yield Index** is an unmanaged, U.S. dollar-denominated, nonconvertible, non-investment-grade debt index. The index consists of domestic and corporate bonds rated Ba and below with a minimum outstanding amount of \$150 million.

The **Bloomberg U.S. Corporate Investment Grade Index** is an unmanaged index composited of the qualifying universe of investment grade rated taxable corporate bonds. The index includes U.S.-denominated securities publicly issued by U.S. and non-U.S. industrial, utility, and financial issuers.

The **Bloomberg U.S. 1-10 Year Municipal Index** is a market value-weighted index which covers the short and intermediate components of the Bloomberg Municipal Bond Index.

The **DJ Equity ALL REIT Index** represents all publicly traded real estate investment trusts in the Dow Jones U.S. stock universe classified as Equity REITs according to the Dow Jones REIT Industry Classification Hierarchy. These companies are REITs that primarily own and operate income-producing real estate.

The **ICE 3M USD LIBOR** is the primary benchmark for short-term interest rates globally, used for mortgages, loans, for interest rate contracts on futures and options exchanges, and as a general gauge of the health of financial monetary markets.

The **MSCI World ex USA Index** captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries excluding the United States. The index covers approximately 85% of the free float-adjusted market capitalization in each country.

The **MSCI ACWI Investable Market Index (IMI)** captures large, mid and small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries*.

The **MSCI Emerging Markets Investable Market Index (IMI)** captures large, mid and small cap representation across 23 Emerging Markets (EM) countries. The index covers approximately 99% of the free float-adjusted market capitalization in each country.

The **S&P 500® Index** is a readily available, carefully constructed, market-value-weighted benchmark of common stock performance. Currently, the S&P® Composite includes 500 of the largest stocks (in terms of stock market value) in the United States; prior to March 1957 it consisted of 90 of the largest stocks.

The **S&P SmallCap 600® Index** is designed to measure the performance of the small capitalization sector of the U.S. equities market. This index consists of 600 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation.

The **S&P MidCap 400® Index** is designed to measure the performance of the mid capitalization sector of the U.S. equities market. This index consists of 400 domestic stocks chosen for market size, liquidity, (bid-asked spread, ownership, share turnover and number of no trade days) and industry group representation.
