## Fund Facts

### Investment Objective:

Seeks current income exempt from federal and Virginia income taxes consistent with preservation of capital.

Total Net Assets	\$53,806,077
Number of Holdings	40
Average Life	6.07 Years
Effective Duration	5.17 Years
Turnover	24%
Income Subject to AMT	0.00%
Income Subject to State Tax	0.00%

The fund's income may be subject to certain state and local taxes, and depending on an investor's tax status, to the federal alternative minimum tax (AMT).

### Total Expense Ratio

	Net	Gross
A Shares (BVAAX)	0.86%	0.86%
C Shares (BVACX)	1.61%	1.61%
Inst'l Shares (BVATX)	0.61%	0.61%

### Dividend Distribution

Month	Rates/A Share
October	\$0.0185
November	\$0.0184
December	\$0.0191
December NAV	\$11.26

### Effective Duration Breakdown

0-1 Yr.	10.2%
1-2 Yr.	7.1%
2-3 Yr.	4.4%
3-5 Yr.	24.5%
5-10 Yr.	51.3%
10+ Yr.	2.4%

The composition of the fund's holdings is subject to change.

### 30-Day SEC Yield

	With Waivers	Without Waivers
A Shares (BVAAX)	2.41%	2.41%
Inst'l Shares (BVATX)	2.71%	2.71%

SEC Yield is an annualization of the fund's total net investment income per share for the 30-day period ended on the last day of the month.

### Philosophy & Process

In managing the Fund, the team specializes in actively building and managing a high credit quality fixed income portfolio focused on the intermediate segment of the yield curve offering. The team employs a top-down investment process that focuses on: duration management, yield curve strategy and finding the best relative value with limited amount of risk in order to maximize the risk-adjusted total return.

**Buy Strategy:** We buy high quality, liquid issues and seek the best relative sector and security values available. We attempt to maximize total return and current income while reducing price volatility.

**Sell Strategy:** We will consider selling a security we own in order to reposition the Fund along the yield curve and adjust the Fund's average maturity or duration. In addition, we might replace a security with one that offers greater potential for total return or when its credit fundamentals are deteriorating.

### Investment Considerations

The funds are subject to the same risks as the underlying bonds in the portfolios such as credit, prepayment and interest rate risk. As interest rates rise, the value of bond prices will decline and an investor may lose money. The funds are non-diversified and may invest a greater percentage of its assets in a single issuer than funds that are more diversified. Furthermore, the Funds invest primarily in state-specific municipal obligations of issuers and therefore will be affected by economic, political or other events affecting municipal issuers.

**Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the fund, please call 888.228.1872 or visit our website at [www.sterlingcapital.com](http://www.sterlingcapital.com). Read the prospectus carefully before investing.**

**Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end and information on other share classes, please visit [www.sterlingcapital.com](http://www.sterlingcapital.com). Performance for periods greater than one year is annualized.**

### Quality Breakdown

Credit quality ratings using S&P's ratings symbols reflect the credit quality of the underlying bonds in the fund portfolio and not of the fund itself. Securities are rated by S&P's, Moody's and Fitch; when ratings vary the highest rating available for each security is applied. Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). "NR" is used to classify securities for which a rating is not available. Bond quality ratings are subject to change.

Portfolio Composition	Fund	Index
General Obligation	47.1%	27.3%
Pre-Refunded	6.8%	3.5%
Revenue	45.5%	69.2%
Cash	0.5%	--
<b>Total</b>	<b>100.0%</b>	<b>100.0%</b>

## Lipper Other States Intermediate Municipal Category Based on Total Return as of 12.31.2023

	1 Year	3 Years	5 Years	10 Years
Lipper Ranking/Number of Funds in Category	39/54	30/54	20/53	28/45
Lipper Quartile (Percentile)	3rd (71%)	3rd (55%)	2nd (38%)	3rd (61%)

## Morningstar Muni Single State Interm Category Based on Risk-Adjusted Returns as of 12.31.2023

	Overall Rating	1 Year	3 Years	5 Years	10 Years
Institutional Shares Morningstar Rating™	★★★	--	★★★	★★★	★★
Morningstar Ranking/Number of Funds in Category	126	99/128	49/126	45/124	73/108
Morningstar Quartile (Percentile)		4th (80%)	2nd (37%)	2nd (36%)	3rd (67%)

**A Note on Indices:** The volatility of an index varies greatly. All indices are unmanaged and investments cannot be made directly in an index.

**The ICE BofA 2-17 Year Municipal Bond Index** is an unmanaged index composed of securities that are SEC-registered, tax-exempt, and dollar denominated. The index covers the intermediate U.S. investment grade fixed rate municipal bond market, with index components for municipal securities. It is not possible to invest in the BofA 2-17 Year Municipal Bond Index, which is unmanaged and does not incur fees and charges.

**The Lipper Other States Intermediate Municipal Debt Index** reflects the average time-weighted rate of return of a representative group of intermediate municipal state-specific bond funds over time. Refinitiv™ Lipper® defines an intermediate municipal state-specific bond fund as a fund that invests in municipal debt issues with dollar-weighted average maturities of five to ten years and are exempt from taxation on a specified state or city basis. Lipper ensures that no restricted track record extensions are permitted, meaning only real histories represent the independently collected data. Source: Refinitiv Lipper.

Ratings and Rankings would have been lower for Class A shares due to fees and expenses. Lipper and Morningstar rankings are based on total return, including the reinvestment of dividends and capital gains but do not include sales charges for the periods indicated. Rankings shown are for Class I Shares and may be lower for Class A Shares due to higher fees and expenses. Mutual funds are assigned a rank within a universe of funds, relative to a peer group and similar in investment objective as determined by Lipper and Morningstar. The lower the number rank, the better the fund performed compared to other funds in the classification group. Lipper and Morningstar also calculate a percentile measure for each fund ranging from 1% (best) to 100% (worst).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

**Technical Terms:** **Effective Duration** calculates the average life of individual bonds within a bond fund, and serves as a useful measure of the entire portfolio's sensitivity to rising and falling interest rates. An Effective Duration of 2.00 means that with a 1% decline in interest rates, the principal value should rise by 2%, and vice versa. **Portfolio Turnover Rate** measures a fund's annual trading activity. It is a percentage used to demonstrate how many holdings in a mutual fund were replaced within the year. (Sources: Corporate Finance Institute; Investopedia.)
