Overall Morningstar Rating™

Overall rating against 426 Funds in the Morningstar U.S. Fund Intermediate Core Bond Category as of 03.31.2024, derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. (SCSPX)

Fund Facts

Investment Objective:

Seeks to maximize total return.

Total Net Assets	\$88,930,095
Number of Holdings	219
Average Life	7.12 Years
Effective Duration	5.20 Years
Turnover	17%

Total Expense Ratio

	Net	Gross
A Shares (SCSSX)	0.82%	0.87%
C Shares (SCSTX)	1.57%	1.62%
Inst'l Shares (SCSPX)	0.57%	0.62%

The Advisor has contractually agreed to limit certain fees paid by the Fund from February 1, 2024 through January 31, 2025. Performance would have been lower without limitations in effect.

Dividend Distribution

Month	Rates/A Share
January	\$0.0235
February	\$0.0242
March	\$0.0244
March NAV	\$8.89

Effective Duration Breakdown

0-1 Yr.	7.1%
1-2 Yr.	5.7%
2-3 Yr.	14.1%
3-5 Yr.	20.9%
5-10 Yr.	45.2%
10+ Yr.	7.0%

The composition of the Fund's holdings is subject to change.

30-Day SEC Yield

	With Waivers	Without Waivers
A Shares (SCSSX)	3.31%	3.26%
Inst'l Shares (SCSPX)	3.63%	3.58%

SEC Yield is an annualization of the Fund's total net investment income per share for the 30-day period ended on the last day of the month.

Fund Performance For the Period Ended 03.31.2024	QTR	YTD	1Y	3Y	5Y	10Y	Since Inception
A Shares with 2.00% Sales Charge	-2.16%	-2.16%	0.28%	-2.50%	-0.09%	1.28%	1.59%
A Shares without Sales Charge	-0.20%	-0.20%	2.30%	-1.83%	0.31%	1.48%	1.75%
Institutional Shares	-0.14%	-0.14%	2.67%	-1.58%	0.56%	1.74%	1.98%

Lipper U.S. Mortgage Median	-0.71%	-0.71%	1.53%	-2.98%	-0.36%	0.97%	---

Year-End Performance	2017	2018	2019	2020	2021	2022	2023
A Shares without Sales Charge	2.84%	1.13%	5.97%	4.43%	-1.30%	-9.26%	4.81%
Institutional Shares	3.09%	1.48%	6.22%	4.58%	-1.05%	-9.03%	5.07%
Bloomberg U.S. MBS Index	2.47%	0.99%	6.35%	3.87%	-1.04%	-11.81%	5.05%

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end and information on other share classes, please visit www.sterlingcapital.com. Performance is annualized for periods greater than one year.

Performance for Class A Shares and Institutional Shares for periods prior to inception on February 1, 2013 is based on performance of Class S Shares of the Fund which were re-designated as Institutional Shares as of February 1, 2013. The inception date for Class S Shares was June 30, 2011. Class A Shares and Institutional Shares of the Fund would have substantially similar performance because the Shares are invested in the same portfolio of securities and the performance would differ only to the extent that the Classes have different expenses.

Quality Breakdown

Credit quality ratings using S&P's ratings symbols reflect the credit quality of the underlying bonds in the Fund portfolio and not of the Fund itself. Securities are rated by S&P's, Moody's and Fitch; when ratings vary the highest rating available for each security is applied. Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). "NR" is used to classify securities for which a rating is not available. Bond quality ratings are subject to change.

Portfolio Composition	Fund	Index
Securitized	94.7%	100.0%
ABS	14.4%	---
CMBS	18.2%	---
CMO	24.7%	---
MBS Passthrough	37.4%	100.0%
Treasury	4.8%	---
Cash	0.5%	---
Total	100.0%	100.0%

Allocations are based on the current weight to funds in the cited category. The composition of the Fund's holdings is subject to change.

Philosophy & Process

In managing the Fund, the portfolio management team employs a multi-faceted approach to generate excess return and uses a combination of top-down and bottom-up analysis, quantitative vs. qualitative analysis and fundamentals vs. valuation. There is a strong emphasis on risk management and an adherence to certain core investment beliefs: (1) "if you cannot measure it, you cannot manage it;" (2) avoid unintended exposures; (3) average duration is expected to be within 1.5 years of the duration of the Fund's index; (4) participate in longer term trends - don't buy on short-term trends or try to time what is going on in the market; and (5) attempts to achieve risk-adjusted performance over time.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 888.228.1872 or visit our website at www.sterlingcapital.com. Read the prospectus carefully before investing.

A Note on Indices: The volatility of an index varies greatly. All indices are unmanaged and investments cannot be made directly in an index.

The Bloomberg U.S. MBS Index covers the mortgage-backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). It is formed by grouping the universe of individual fixed rate MBS pools into generic aggregates.

The Lipper U.S. Mortgage Index reflects the average time-weighted rate of return of a representative group of U.S. mortgage funds over time. Refinitiv™ Lipper® defines a U.S. mortgage fund as a fund that invests primarily in U.S. government agency and/or non-agency mortgage-backed securities. Lipper ensures that no restricted track record extensions are permitted, meaning only real histories represent the independently collected data. Source: Refinitiv Lipper.

Ratings and Rankings would have been lower for Class A shares due to fees and expenses. Lipper and Morningstar ratings are based on total return, including the reinvestment of dividends and capital gains but do not include sales charges for the periods indicated. Rankings shown are for Class I Shares and may be lower for Class A Shares due to higher fees and expenses. Mutual funds are assigned a rank within a universe of funds, relative to a peer group and similar in investment objective as determined by Lipper and Morningstar. The lower the number rank, the better the fund performed compared to other funds in the classification group. Lipper and Morningstar also calculate a percentile measure for each fund ranging from 1% (best) to 100% (worst).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Technical Terms: **Effective Duration** calculates the average life of individual bonds within a bond fund, and serves as a useful measure of the entire portfolio's sensitivity to rising and falling interest rates. An Effective Duration of 2.00 means that with a 1% decline in interest rates, the principal value should rise by 2%, and vice versa. **Portfolio Turnover Rate** measures a fund's annual trading activity. It is a percentage used to demonstrate how many holdings in a mutual fund were replaced within the year. (Sources: Corporate Finance Institute; Investopedia.)
