Fund Facts

Investment Objective:

Seeks maximum long-term total return by investing primarily in international developed market equity securities.

Total Net Assets	\$134,133,861
Number of Holdings	108
Wtd. Median P/E	10.67x
Wtd. Median P/B	1.32x
Wtd. Avg. Market Cap	\$43.28B
Active Share	80.86%
Turnover	78%

Annual turnover data is shown as of 09.30.2024, the most recent fiscal year end.

Total Expense Ratio

	Net	Gross
A Shares (SBIAX)	0.93%	0.93%
C Shares (SBIDX)	1.68%	1.68%
Inst'l Shares (SBIIX)	0.68%	0.68%
R6 Shares ¹ (STRCX)	0.62%	0.68%

¹The Fund Administrator, Sterling Capital Management LLC, has contractually agreed to waive its administrative fees, pay Fund operating expenses, and/or reimburse the Fund .06% of the Class R6 avg. daily net assets for the period February 1, 2024 through January 31, 2025. Performance would have been lower without limitations in effect.

30-Day SEC Yield

	With Waivers	Without Waivers
A Shares (SBIAX)	3.65%	3.65%
Inst'l Shares (SBIIX)	3.89%	3.89%

SEC Yield is an annualization of the Fund's total net investment income per share for the 30-day period ended on the last day of the month.

Fund Performance

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end and information on other share classes, please visit www.sterlingcapital.com. Performance is annualized for periods greater than one year.

Sector Allocation

Allocations are based on the current weight to funds in the cited Sector. The composition of the Fund's holdings is subject to change.

Philosophy & Process

The portfolio management team applies "behavioral finance" principles in the construction of the Fund's portfolio. Behavioral finance theorizes that investment decisions are often influenced by biases, heuristics (i.e., experienced-based techniques for decision making) and emotion, and that investors can be predictable (and, at times, irrational) in their decision making. These emotionally charged investment decisions can lead to stock price anomalies that create opportunities in the marketplace. The portfolio management team seeks to capitalize on these behaviorally driven market anomalies by employing a disciplined investment process. In implementing behavioral finance principles, Sterling Capital ranks companies in the Fund's investment universe based on a number of factors that it believes can be indicators of under- or over-valuation of a security by the market, such as valuation (e.g., seeking to invest in companies that Sterling Capital believes are undervalued), price momentum (e.g., identifying securities that Sterling Capital believes will experience sustained positive price momentum) and earnings revisions (e.g., identifying and capitalizing on what Sterling Capital believes are under-reactions by the market to positive earnings revisions). The portfolio management team also takes into account such factors as market capitalization, country exposure, and sector exposure to construct a diversified portfolio. The portfolio management team considers selling a security when the security's ranking becomes less attractive and/or in light of liquidity, sector exposure, country exposure or diversification considerations.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 888.228.1872 or visit our website at www.sterlingcapital.com. Read the prospectus carefully before investing.

Morningstar Foreign Large Value Category For the Period Ended 09.30.2024

	Overall Rating	1Y	3Y	5Y
Institutional Shares Morningstar Rating™	★★	--	★★★	★★
Morningstar Ranking/Number of Funds in Category	331	172/356	162/331	274/305
Morningstar Quartile (Percentile)		2nd (49%)	3rd (51%)	4th (87%)

Note: Morningstar Ratings are based on risk-adjusted returns. Morningstar Rankings are based on total return.

A Note on Indices: The volatility of an index varies greatly. All indices are unmanaged and investments cannot be made directly in an index.

The **Bloomberg Developed Markets ex N. America Large & Mid Cap Index** is a float market-cap-weighted equity benchmark that covers 85% market cap of the measured market. The Lipper International Multi-Cap Value Index reflects the average time-weighted rate of return of a representative group of international multi-cap value funds over time. Refinitiv™ Lipper® defines an international multi-cap value fund as a fund that, by portfolio practice, invests in a variety of market-capitalization ranges without concentrating 75% of its equity assets in any one market-capitalization range over an extended period of time. Lipper ensures that no restricted track record extensions are permitted, meaning only real histories represent the independently collected data. Source: Refinitiv Lipper.

Ratings and Rankings would have been lower for Class A shares due to fees and expenses. Lipper and Morningstar rankings are based on total return, including the reinvestment of dividends and capital gains but do not include sales charges for the periods indicated. Rankings shown are for Class I Shares and may be lower for Class A Shares due to higher fees and expenses. Mutual funds are assigned a rank within a universe of funds, relative to a peer group and similar in investment objective as determined by Lipper and Morningstar. The lower the number rank, the better the fund performed compared to other funds in the classification group. Lipper and Morningstar also calculate a percentile measure for each fund ranging from 1% (best) to 100% (worst).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the risk-adjusted performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Technical Terms: **Active Share** measures the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Portfolio Turnover Rate** measures a fund's annual trading activity. It is a percentage used to demonstrate how many holdings in a mutual fund were replaced within the year. **Weighted Average P/B** compares the book value of fund's stocks with their market value. The price to book ratio indicates how much an investor is paying for a company's assets based on historical valuations. It does not reflect current market value. **Weighted Median P/E** compares the price of a fund's stocks with their per-share earnings, with a higher ratio indicating the market believes that a company has the ability to increase its earnings.
