Fund Facts

Investment Objective:

Seeks current income consistent with the preservation of capital.

Total Net Assets	\$16,829,146
Number of Holdings	85
Average Life	5.60 Years
Effective Duration	4.27 Years
Turnover	12%

Total Expense Ratio

	Net	Gross
A Shares (BGVAX)	0.75%	0.92%
C Shares (BIUCX)	1.50%	1.67%
Inst'l Shares (BBGVX)	0.50%	0.67%

The Advisor has contractually agreed to limit certain fees paid by the Fund from February 1, 2023 through January 31, 2024. Performance would have been lower without limitations in effect.

Dividend Distribution

Month	Rates/A Share
April	\$0.0171
May	\$0.0172
June	\$0.0173
June NAV	\$8.55

Effective Duration Breakdown

0-1 Yr.	1.9%
1-2 Yr.	10.0%
2-3 Yr.	18.4%
3-5 Yr.	35.7%
5-10 Yr.	34.0%

The composition of the fund's holdings is subject to change.

30-Day SEC Yield

	With Waivers	Without Waivers
A Shares (BGVAX)	2.88%	2.70%
Inst'l Shares (BBGVX)	3.19%	3.00%

SEC Yield is an annualization of the fund's total net investment income per share for the 30-day period ended on the last day of the month.

Philosophy and Process

The fund invests, under normal market conditions, in U.S. government securities, some of which may be subject to repurchase agreements, or in "high grade" (rated at the time of purchase in one of the three highest rating categories by a nationally recognized statistical rating organization or are determined by the portfolio manager to be of comparable quality) mortgage-backed securities, including collateralized mortgage obligations.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To obtain performance information current to the most recent month end and information on other share classes, please visit www.sterlingcapital.com. Performance for periods greater than one year is annualized.

A Note on Indices: The volatility of an index varies greatly. All indices are unmanaged and investments cannot be made directly in an index.

The Bloomberg Intermediate U.S. Government Bond Index is a component of the Bloomberg Government Index with sectors including Treasuries and Agencies. Securities must have a maturity from 1 year up to (but not including) 10 years. Securities must have at least one year to final maturity regardless of call features; must be rated investment grade (Baa3/BBB- or higher) by at least two of the following ratings agencies: Moody's, S&P, Fitch; must have at least \$250 million par outstanding; must be dollar denominated, non-convertible and publicly issued.

The Lipper Intermediate U.S. Government Index reflects the average time-weighted rate of return of a representative group of intermediate U.S. government bond funds over time. RefinitivTM Lipper[®] defines an intermediate U.S. government bond fund as a fund that invests primarily in securities issued or guaranteed by the U.S. government, its agencies, or its instrumentalities, with dollar-weighted average maturities of five to ten years. The funds that comprise the index are intended to be employed as a good representation of combined peer group performance, acting as relevant benchmarks to measure single fund manager performance and rankings within that peer group. Lipper ensures that no restricted track record extensions are permitted, meaning only real histories represent the independently collected data. Source: Refinitiv Lipper.

Quality Breakdown

Credit quality ratings using S&P's ratings symbols reflect the credit quality of the underlying bonds in the fund portfolio and not of the fund itself. Securities are rated by S&P's, Moody's and Fitch; when ratings vary the highest rating available for each security is applied. Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). "NR" is used to classify securities for which a rating is not available. Bond quality ratings are subject to change.

Portfolio Composition	Fund	Index
Corporate	2.1%	--
Financial Institutions	1.7%	--
Utility	0.4%	--
Government Related	14.3%	3.2%
Agency	13.6%	3.2%
Local Authority	0.7%	--
Securitized	69.2%	--
ABS	1.9%	--
CMBS	20.1%	--
CMO	17.1%	--
MBS Passthrough	30.0%	--
Treasury	14.0%	96.9%
Treasury	14.0%	96.9%
Cash	0.4%	--
Total	100.0%	100.0%

Lipper Intermediate U.S. Govt Category Based on Total Return as of 06.30.2023

	1 Year	3 Years	5 Years	10 Years
Lipper Ranking / Number of Funds in Category	8 / 60	13 / 57	22 / 55	25 / 46
Lipper Quartile (Percentile)	1st (14%)	1st (23%)	2nd (40%)	3rd (54%)

Morningstar Intermediate Government Category Based on Risk-Adjusted Returns as of 06.30.2023

	Overall Rating	1 Year	3 Years	5 Years	10 Years
Institutional Shares Morningstar Rating™	★★★★	--	★★★★	★★★★	★★★
Morningstar Ranking / Number of Funds in Category	224	24 / 233	23 / 224	57 / 214	93 / 175
Morningstar Quartile (Percentile)		1st (20%)	1st (13%)	2nd (36%)	3rd (61%)

Ratings and Rankings would have been lower for Class A shares due to fees and expenses. Lipper and Morningstar rankings are based on total return, including the reinvestment of dividends and capital gains but do not include sales charges for the periods indicated. Rankings shown are for Class I Shares and may be lower for Class A Shares due to higher fees and expenses. Mutual funds are assigned a rank within a universe of funds, relative to a peer group and similar in investment objective as determined by Lipper and Morningstar. The lower the number rank, the better the fund performed compared to other funds in the classification group. Lipper and Morningstar also calculate a percentile measure for each fund ranging from 1% (best) to 100% (worst).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Technical Terms: **Effective Duration** calculates the average life of individual bonds within a bond fund, and serves as a useful measure of the entire portfolio's sensitivity to rising and falling interest rates. An Effective Duration of 2.00 means that with a 1% decline in interest rates, the principal value should rise by 2%, and vice versa. **Portfolio Turnover Rate** measures a fund's annual trading activity. It is a percentage used to demonstrate how many holdings in a mutual fund were replaced within the year. (Sources: Corporate Finance Institute; Investopedia.)
